

# GRE SYNS USER MANUAL

## DESCRIPTION

GRE SYNS is the perfect application to build your vocabulary as well as your partner to prepare for your GRE. What makes GRE SYNS stand out apart from other apps is the ability to group the words you find similar in meaning so that u can study them together. It gives user the ability to create new groups and add words to these groups as well as the existing groups.

## GUIDE TO USE GRE SYNS(GS)

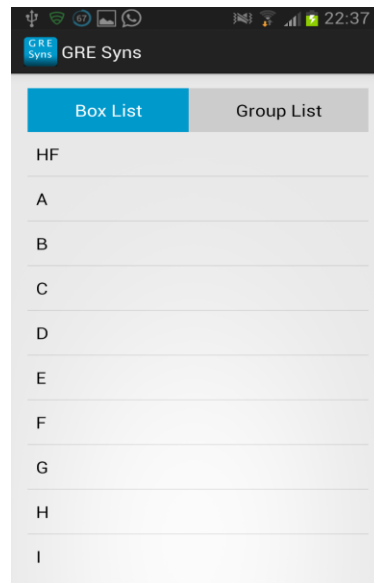

1. Locate and click on GRE Syns (GS) icon in application menu

2. After clicking on APL icon, you will see a splash screen followed by list of boxes categorizing the words according to initial letters and two buttons “**Box List**” and “**Group List**” allowing switching between Box view and group view.

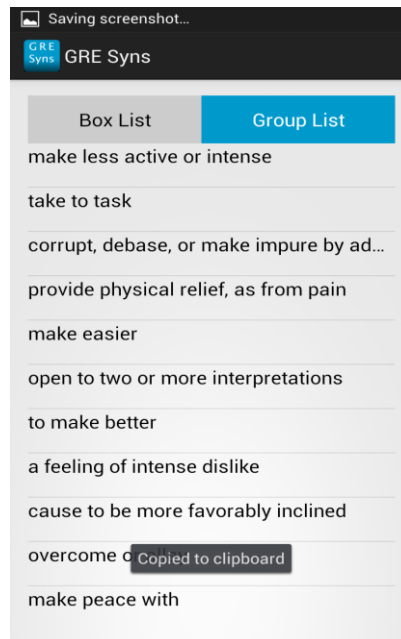

**a.Splash Screen**

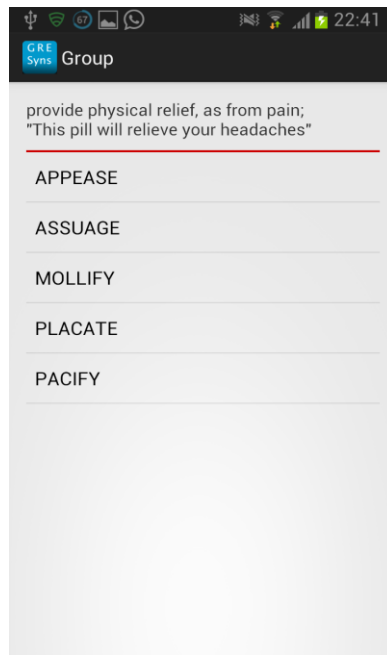

**b.Box View**

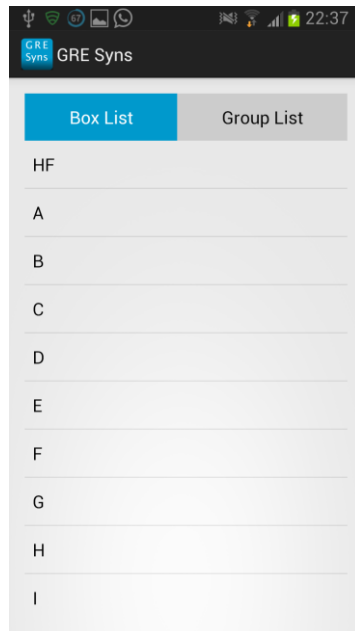

3. On clicking the “**Group List**” button , you will see a list of groups both default and user made groups of words.

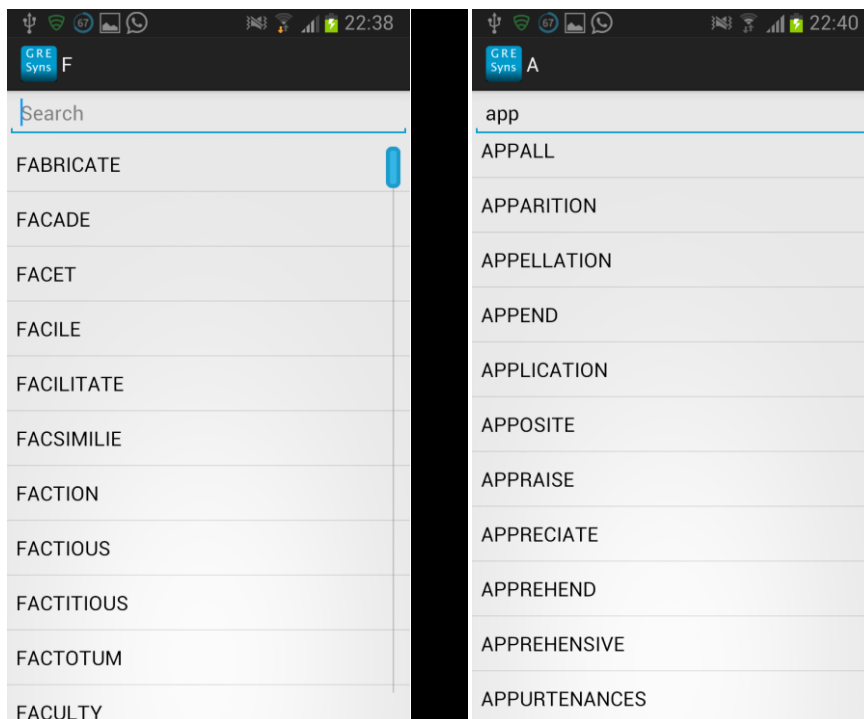

4. On clicking a list item from the group view you can view the meaning and the words in that group.

5. When in the box list you can click on any of **HF**(high frequency GRE words) or **A,B** etc to view the list of words starting from respective letters. You can use the search box to find words.

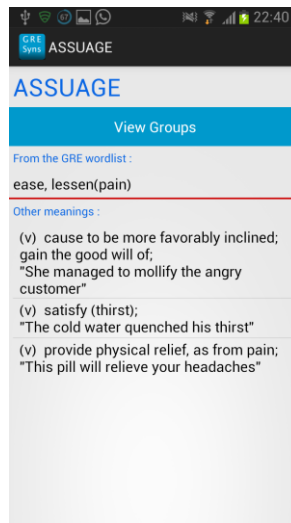

6. You can then see words starting from the letter selected and use the search box to find words.

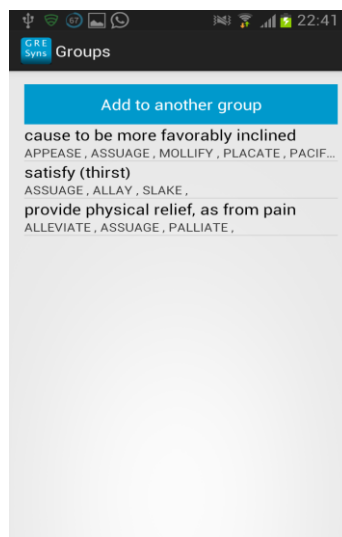

**a.Words from Box 'F'**

**b.Using search in Box 'A'**

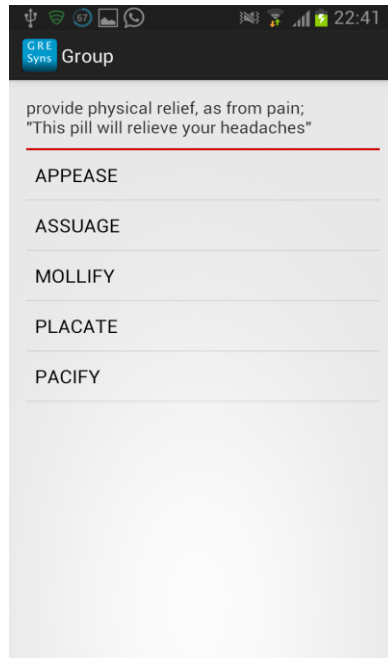

7. On clicking on any word, the screen for the respective word is displayed. The screen has the word name, its meanings (meanings are divided into meanings you need to know for GRE and other detailed meanings from the dictionary). Also the screen has a button **“View groups”** which allows you to view groups in which the word is present along with the context of the group.

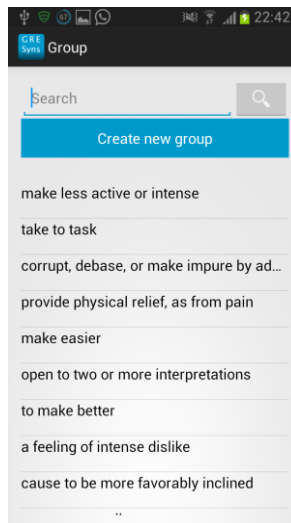

8. On clicking the view groups button the user is presented with a list of groups in which the word is present and a button **“Add to another groups”**.

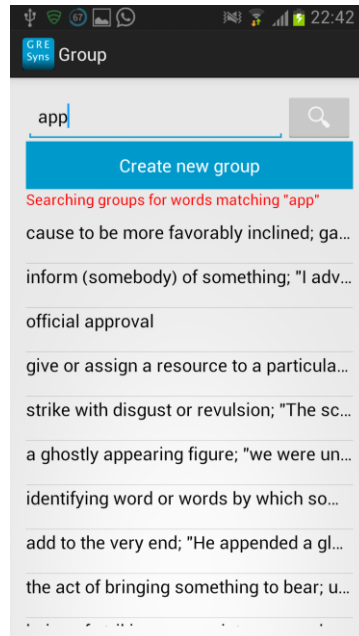

9. On clicking a group from the list item the meaning or the context of the group is displayed along with the list of group members.

10. On clicking “**Add to another group**”, you can see a list of already existing groups with every list item showing the meaning of the group. Also you can see a search bar and a “**search**” button and a “**New group**” button.

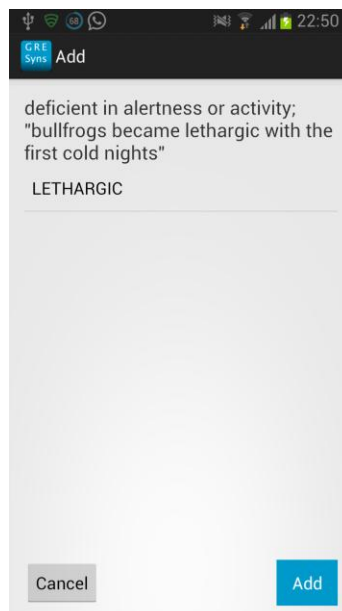

11. When you type something and press the “**search**” button, you are shown with the list of groups which contain words matching your search.

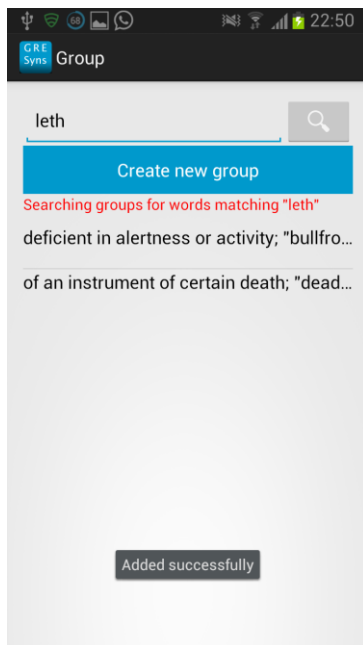

**a.searching groups for words matching ‘app’**

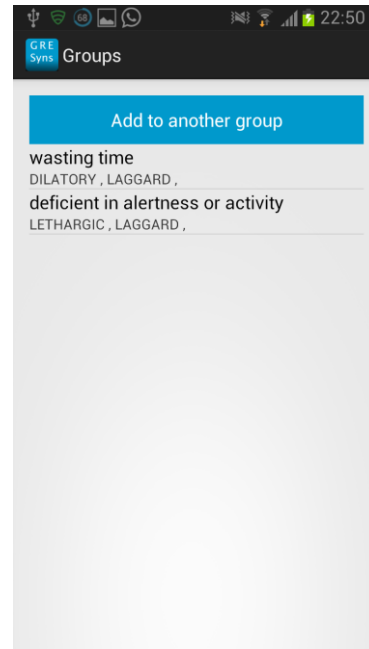

12. When a particular group is clicked from the list , the meaning of the group and its members are displayed along with a confirming “**add**” button.

13. When the “**add**” button is pressed the word which the user was viewing is added to the particular group.

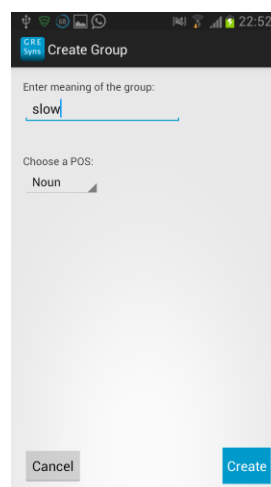

**a.Toast displayed after adding**

**b.Grouplist for laggard after adding**

14. You can create your own groups by pressing the “**new group**” button. On clicking the button a new screen is displayed asking the user for the meaning he would like to give to the group as he likes and whether the meaning is a noun, verb or adjective. On clicking on “**create**” button the group is created in the database and the user will be able to add words in the future to this group.
